

## Chris Powers

### Equipment To Be Provided By Venue/Promoter For D.J. Work

- A) Twin Disc Decks or 2 separate units with small mixer/control unit -- this is then fed into the venue P.A. or speaker system
- B) A small Light Unit so I can see what I'm doing. If there is enough lighting already in the area I am working the light unit will not be needed.
- C) Table for the decks and my record box.  
Approx size of table:  
Height : 800 to 1000mm  
Length : 1500mm (1½ mtrs) minimum  
Width : 600mm
- D) Microphone - complete with stand

Here is a schematic of the set-up:
